THE NEW FACE OF DIMMER SWITCHES

KEY FEATURES :

- Unlimited Aesthetic Options
- No Physical Contact Necessary
- No Moving Parts
- No Visible Controls
- Easy To Use
- Proximity Sensing Technology
- UL Listed

TOUCHLESS DIMMERS AND CONTROLS

TOUCHLESS CONTROLS DISAPPEAR WITHIN THE WALLS

Revolutionary Sensor - Based Design makes traditional light switches obsolete by eliminating all visible controls:

No more reaching or fumbling for on/off switches, unsightly sliders, toggles and dials.

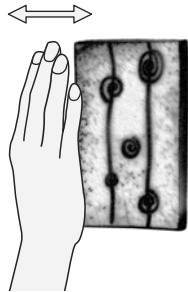

Now your lighting control point is a tasteful decorator wall plate set flush with your wall.

Just pass your hand in front of the wall plate to set the lighting level. You are effortlessly in control with the world's first invisible touchless dimmer. Choose the mood, and choose the look.

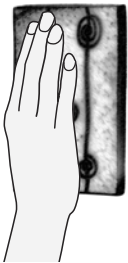

- The finished look of the control unit is entirely customizable. It can virtually disappear within the wall or stand out like a piece of artwork.
- Patented proximity sensing technology* detects user's hand through any material except metal.
- Stone, wood, rubber, glass, plastic, ceramic up to 3/4 inch thick, can be used to cover the control unit.
- No moving parts to break or wear out.
- No tools needed to remove the plate for cleaning or wall painting.

BASIC OPERATION

WAVE FOR ON/OFF

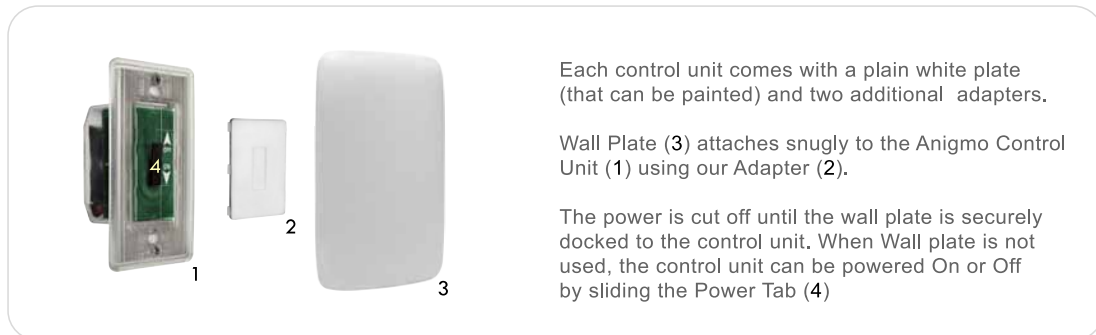

To turn the lights On or Off just wave your hand in front of the Anigmo Dimmer.

HOLD TO DIM

To change the light intensity simply hold your hand in front of the Anigmo Dimmer. Move your hand away when you have created the lighting you want.

visit www.anigmo.com to see other wall plate options

Each control unit comes with a plain white plate (that can be painted) and two additional adapters.

Wall Plate (3) attaches snugly to the Anigmo Control Unit (1) using our Adapter (2).

The power is cut off until the wall plate is securely docked to the control unit. When Wall plate is not used, the control unit can be powered On or Off by sliding the Power Tab (4)

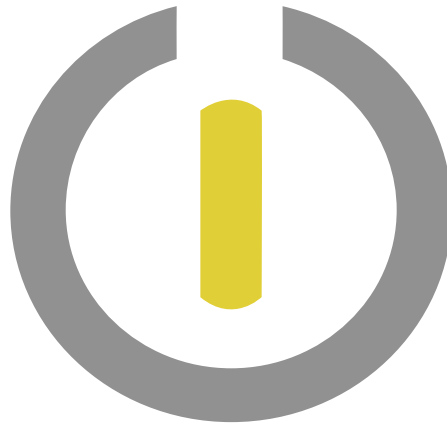

OTHER FEATURES

- Convenient when hands are full, wet or dirty.
- Handy and safe for small children.
- Liberating for people with limited mobility.
- Easy-to-find in the dark even without indicator light.
